

ELECOMPACK

CASE STUDY

Powell, Goldstein, Frazer & Murphy, Atlanta, GA

When Powell, Goldstein, Frazer & Murphy, a 300 lawyer law firm, leased new space in downtown Atlanta, they knew file space would have to be used efficiently. That is why high density mobile files were included into the interior design for the file room.

"After evaluating many other mobile systems, Elecompack was selected to do the job. Their product had features relative to safety and function that made our choice easy," according to Sanford Yarbrough, the former Records Manager.

Specifically designed to withstand the stress of major seismic activity, the Elecompack system is different from every other mobile system on the market. Instead of simply "attaching" shelving to mobile carriages, uprights are recessed five inches into the structure, providing the maximum strength and ensuring the system will remain stable and secure.

Elecompack is also the only mobile system confident enough in its design to provide a full ten year warranty on all the system components. For most users, knowing the system will be trouble-free for a decade is a major consideration.

The installation was completed without any problems. "Elecompack delivered on time and the system looks and operates great," states current records manager, Dana C. Wheelock.

The system is electronically operated and

consists of 17 ranges of legal depth shelves. Each range is 33 feet in length and finished in a special color to match the new decor.

The entire system provides 75,922 linear filing inches of storage capacity in only 2,226 square feet of floor space. The ranges are equipped with access controls at both ends of the carriages for easy access to all aisles. Construction, safety and simplicity were major factors in the decision to purchase Elecompack. "We have been very pleased with the installation and service," says Ms. Wheelock.

Powell, Goldstein, Frazer & Murphy are just one of many law firms that have selected the Elecompack solution. In almost all cases, safety has been a driving concern in their decision making processes. A more complete list of users is available at our website at www.elecompack.com.
